SUMMARY

Backend-leaning full-stack engineer specializing in **Node.js** and **NestJS**, with hands-on experience architecting and shipping production financial-transaction systems. Deep security and testing discipline: **RBAC**/access-control design, PII protection, and rigorous automated test coverage. Additional fintech exposure through contract work building AI-assisted tools for Chartered Accountant and financial-advisory clients.

EXPERIENCE

StejasSYS

Chennai, India (remote)

Software Engineer (Full-time)

Jan 2025 – Present.

- Architected and built the **NestJS** backend for **Zion Taxi**, a live ride-hailing platform processing real payments (300+ active drivers) across outstation and one-way-drop trips, owning module boundaries, the fare/pricing-strategy pattern, and caching/coherency design end-to-end.
- Implemented the platform's transactional core (Razorpay payment gateway integration, commission/ledger settlement, rider debt/balance resolution) and a security-hardened access layer (RBAC with granular permission grants and audit-actor coverage, PII-masking interceptors, WebAuthn, CIDR-based access restriction) for correctness and auditability on real-money flows.
- Wrote and maintain the platform's Jest unit test suite across backend and frontend, totaling **3,700 test cases** covering payments, fare pricing, and realtime Socket.io gateways.
- Innkraft's AI hotel sales agent**, a LangChain/LangGraph-powered WhatsApp/Telegram booking assistant serving 5 hotel clients: developed its conversation orchestration core and RAG-based knowledge retrieval system (pgvector).
- Full-stack ownership of **Culinex**, an in-house restaurant operations platform (multi-outlet inventory, waste tracking, POS sales-data reconciliation), and own the company's cloud infrastructure (GCP IAM, load balancers, CDNs, Docker, GitHub Actions CI/CD) while coordinating with a 3-5 person engineering team.
- Stack:** NestJS, TypeScript, Jest, Razorpay, RBAC/WebAuthn, Redis, Socket.io, Drizzle ORM, Prisma, PostgreSQL, LangChain, LangGraph, pgvector, React 19, Next.js, Docker, GCP, GitHub Actions.

Software Developer (Part-time)

Jul 2024 – Dec 2024.

- Shipped full-stack features using Next.js, TypeScript, Tailwind CSS, and Payload CMS, leading the transition from low-code tooling to custom-built solutions.
- Diagnosed and fixed a major performance bottleneck (image handling and prefetching), cutting page load time from 15s to 1-2s.
- Stack:** Next.js, TypeScript, Tailwind CSS, Payload CMS, Docker, GCP.

Flookup Capital Advisors (One21.ai)

Mumbai, India (remote)

Contract Software Engineer (part-time/occasional)

Sep 2023 – Present.

- Developed and deployed custom web applications for finance & tech clients, primarily Chartered Accountant-related fintech services, under the One21.ai product umbrella.
- Developed and scaled backend solutions on AWS and Supabase, including load balancers, S3 storage, and CloudFront CDN for optimized asset delivery.
- Shipped production fintech-adjacent tools including MCA Tech, a business intelligence platform with real-time financial data and risk assessments across 2.6M+ companies, and CAGPT, an AI-powered platform delivering finance, taxation, and compliance guidance for accounting professionals.
- Stack:** Next.js, TypeScript, AWS, Supabase, Vercel.

LingoScriptAI

Chennai, India (remote)

Product Development Engineer

Jul 2023 – Mar 2024.

- Implemented server-side video rendering using **FFMPEG** within a Node.js/Express.js backend, alongside a TypeScript/Next.js frontend and Auth0 authentication.
- Gained hands-on experience with AWS S3 and EC2, contributing to the tool's successful launch.
- Stack:** TypeScript, Next.js, Node.js, Express.js, FFMPEG, Auth0, AWS.

PROJECTS

- 9wealth** | *NestJS, Prisma, Supabase, OpenAI API* Sep 2025 – Present.
- Building a personal finance app for tracking budget, investments, assets, and net worth, with an AI chat interface for spending/investment insights, on a NestJS/Prisma/Supabase backend and a React Native/Expo mobile frontend.
- Community Knowledge Weaver** | *IBM watsonx Orchestrate, MCP, TypeScript* Jan 2026 – Jan 2026.
- Developed an agentic AI assistant unifying scattered organizational knowledge into one chat interface on IBM watsonx Orchestrate, with a multi-agent orchestrator routing questions to specialist agents able to answer and take action via MCP tools.
- Jungli The Nomad** | *Next.js, TanStack Query, Wix CMS/Data API* Jul 2024 – Dec 2025.
- Engineered a custom, server-hydrated video testimonial carousel pulling content natively from 50+ videos in the client's existing Wix CMS, with lazy loading and infinite pagination for smooth playback across the carousel.

EDUCATION

- B.Tech, Electronics & Communication Engineering** Sep 2020 – May 2025.
SRM Institute of Science and Technology CGPA: 8.65.

SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, Python, Bash/Shell
Backend: Node.js, Express.js, NestJS, REST API design & architecture, Socket.io (realtime/WebSockets), Drizzle ORM, Prisma ORM, FFMPEG (server-side video processing)
Frontend: React.js, React 19, Next.js, Tailwind CSS, TanStack Query, Zustand, Redux
Testing: Jest, ts-jest, Supertest, Unit Testing, test-driven development on service/business logic
Payments & Security: Razorpay (payment gateway integration), RBAC (role-based access control, permission grants, audit-actor coverage), Better Auth (multi-tenant RBAC), WebAuthn, PII masking/data protection, CIDR-based access control, Auth0, OAuth
AI/LLM Systems: LangChain, LangGraph (stateful agent orchestration), Retrieval-Augmented Generation (RAG) with pgvector, Langfuse (LLM observability/tracing), OpenAI API
Cloud & Infrastructure: AWS (S3, EC2, CloudFront), Google Cloud Platform (IAM, load balancers, CDN, Compute Engine), Docker & Docker Compose, Nginx, GitHub Actions (CI/CD), Redis
Databases: PostgreSQL (Drizzle/Prisma/Supabase), MongoDB, MySQL
Collaboration & Communication: Cross-functional coordination (engineering and operations), developer mentorship, technical documentation (code-level, onboarding, business-facing), stakeholder communication

CERTIFICATIONS

Claude Code 101: Anthropic Academy, Aug 2026.
Claude 101: Anthropic Academy, Aug 2026.
The Node.js Master Class: Pirple, Jul 2022.
M001: MongoDB Basics: MongoDB University, Jan 2022.
SQL for Data Science: Coursera / UC Davis, Apr 2023.
