Kunal Keshan

Software Engineer

Chennai, Tamil Nadu, India

Summary

What keeps me interested in engineering isn't just building, it's understanding how things hold up over time. I work as a software engineer at a startup, contributing to product development with a focus on clean design, practical decisions, and maintainable systems. I try to look beyond the immediate task and think about how things evolve, for users, teams, and the product itself. Over time, my priorities have shifted away from speed and towards clarity and consistency. I also take on a small number of freelance and consulting projects, both independently and through Codelance Devs. It's a flexible space for collaboration, not something I'm aiming to scale indefinitely. Outside of work, I'm interested in helping students approach technology in a grounded way, without shortcuts or unrealistic expectations. I believe steady, curious learning goes much further than intensity.

Experience

StejasSYS

2 years 2 months

Software Engineer

January 2025 - Present (1 year 8 months)

Chennai, Tamil Nadu, India

- Took ownership of the company's cloud infrastructure, managing GCP IAM policies, load balancers, CDNs, and secret management for secure and scalable deployments.
- Led infrastructure and backend setup for multiple projects, including deploying and maintaining Directus CMS with proper build tagging, code freezing, and version control.
- Authored internal technical documentation, including READMEs, deployment guides, and infrastructure overviews to reduce onboarding friction and improve team autonomy.

- Built Bash automations for local development and deployment workflows; currently implementing CI/CD pipelines using GitHub Actions.
- Mentoring new developers, facilitating knowledge transfer, and continuously seeking improvements in architecture, process, and team productivity while remaining hands-on with engineering tasks.

Software Developer

July 2024 - December 2024 (6 months)

Chennai, Tamil Nadu, India

- Contributed to full-stack web development using Next.js, TypeScript, Tailwind CSS, and Payload CMS, transitioning from low-code tools (Wix) to custom solutions.
- Implemented SSG with on-demand ISR and CMS webhook integrations to ensure seamless content updates between Payload and the frontend.
- Diagnosed and resolved performance bottlenecks, optimizing image handling and disabling unnecessary prefetching, resulting in a 15s → 1–2s drop in load time.
- Reduced Docker bloat for container orchestrations using multi-stage builds, significantly improving build efficiency and deployment speed.
- Gained hands-on experience with GCP services (Compute Engine, Artifact Registry, Cloud Storage), Docker networking, and setting up multi-environment pipelines with internal API routing for cost optimization.

StejasSYS (<https://stejassys.com/about>) is a dependable partner for businesses to grow and scale. With a trusting clientèle and operations based in Atlanta, Ottawa, and Chennai, StejasSYS aims to empower clients with practical solutions and drive positive change through technology.

Flookup Capital Advisors

Contract Software Engineer

September 2023 - Present (3 years)

Mumbai, Maharashtra, India

- Built and deployed custom websites for finance & tech clients, primarily catering to Chartered Accountant–related services.

- Transitioned from no-code platforms (e.g., Webflow ~\$14/month) to custom Next.js deployments on Vercel, reducing recurring hosting costs significantly.
- Delivered dynamic CMS-driven solutions using Sanity, Payload, and Directus, enabling non-technical teams to update content independently.
- Developed and scaled backend solutions on AWS, Supabase, and Vercel, including setup of load balancers, S3 storage, and CloudFront CDN for optimized asset delivery.
- Implemented analytics tracking with custom Google Analytics events to capture business-specific user interactions and insights.
- Shipped multiple production-ready solutions, including:
 - MCA Tech – MCA data lookup & compliance tools (<https://mcatech.one21.ai>)
 - CAGPT – AI-driven CA content search, summarization & chats (<https://cagpt.in>)
 - Snapshot – Company insights & analytics platform (<https://snapshot.one21.ai>)
 - and many other.

LingoScriptAI

Product Development Engineer

July 2023 - March 2024 (9 months)

Chennai, Tamil Nadu, India

- Led development efforts at LingoScriptAI for a content creation tool, actively involved in Agile methodologies from research and development to deployment.
- Utilized a diverse tech stack including TypeScript, Next.js, Tailwind CSS, Auth0, Node.js, and Express.js to build the web application. Implemented FFmpeg for core functionalities like server-side video rendering.
- Gained hands-on experience with AWS services such as S3 and EC2, contributing to the successful launch of the content creation tool. Collaborated effectively with team members, swiftly resolving challenges for streamlined development.

Sundar Clinic

Full-stack Developer

April 2023 - September 2023 (6 months)

Chennai, Tamil Nadu, India

- Developed a responsive website for Sundar Clinic from scratch, ensuring a user-friendly experience and helping the clinic establish an online presence.
- Implemented Sanity CMS integration, empowering clinic staff to efficiently update website content, enhancing overall content management and reducing dependency on developers.
- Conducted performance optimization, resulting in faster page load times and improved user experience for patients visiting sundarclinic.com.

IEEE SRMIST

2 years

Chairperson (Computer Society)

February 2023 - September 2023 (8 months)

Chennai, Tamil Nadu, India

- Actively managed and mentored a diverse team of over 50+ developers and AI/ML learners, providing them with guidance and support to help them grow professionally in all aspects of machine learning.
- Collaborated with industry experts to develop and implement advanced AI/ML concepts and techniques in real-world projects.
- Led the development of several internal projects that enabled the team to hone their skills and gain valuable experience in AI/ML development.

Technical Lead - Web and App Domain

May 2022 - February 2023 (10 months)

Chennai, Tamil Nadu, India

- Mentored and managed a team of 25+ developers, providing guidance and support to help them learn and work on multiple projects.
- Led technical aspects of 4+ successful events, including building event websites and handling registrations, while ensuring smooth operations.

Web Developer

October 2021 - May 2022 (8 months)

Tamil Nadu, India

- Played a key role in the development of 2+ projects for the club, contributing my expertise in web development and collaborating with other members to ensure project completion.
- Actively participated in team-building activities and took the initiative in organizing various club events and activities.
- Learned to work effectively as a team member, leveraging my skills and experience to help drive the success of the club.

Think-Digital, SRM

2 years 4 months

Team Head

October 2022 - April 2023 (7 months)

Chennai, Tamil Nadu, India

- Mentored and managed a team of 40+ developers, teaching them the fundamentals and advanced concepts of full-stack development, enabling them to build various web applications.
- Actively participated in weekly team meetings, offering guidance and support to other domain leads to ensure that the team is working collaboratively towards its goals.
- Collaborated with Think-digital and Codelance Devs to bring in more internship opportunities for developers in the team, enabling them to gain practical experience and improve their skills.

Web Domain Lead

February 2022 - October 2022 (9 months)

Chennai, Tamil Nadu, India

- Mentored a team of 10 developers on full-stack web development and oversaw their progress.
- Completed an in-house project called "Atom" that was used by 200+ community members, managing a team of developers and ensuring timely delivery of milestones.
- Conducted online events and workshops that catered to the needs of the audience, filling in technical gaps and covering topics such as front-end development, back-end development, and version control with Git and GitHub.

Vice Lead Web Domain

September 2021 - February 2022 (6 months)

Chennai, Tamil Nadu, India

- Led multiple workshops on Web Development, covering tech stacks including HTML, CSS, JS, Node.js, Express.js, Git and GitHub, and MySQL.
- Mentored a group of 10+ developers, helping them learn the fundamentals of full-stack development.
- Contributed to an internal club project that served as a platform for a community of 200+ members, utilizing skills in web development and project management.

Web Developer

January 2021 - September 2021 (9 months)

Chennai, Tamil Nadu, India

- Learnt the basics of web development.
- Worked on various club projects while learning to deal with HTML, CSS, and JS.
- Made a mini Full-stack project - Social media application with Node.js, Express.js and MySQL.

SRM University

Project Assistant

November 2022 - March 2023 (5 months)

Chennai, Tamil Nadu, India

- Developed a custom user interface using React, Typescript, and Axios for a neural network model on PYNQ Z-Series hardware, improving accessibility and interaction.
- Collaborated with cross-functional teams, including hardware engineers and medical professionals, to ensure successful user interface integration with the underlying hardware.
- Implemented secure and reliable mechanisms for tunnelling traffic through Ngrok, optimizing performance and ensuring seamless operation of the user interface despite hardware limitations.

Blackwins Tech Solutions

Frontend Developer

May 2022 - July 2022 (3 months)

Chennai, Tamil Nadu, India

- Created and implemented user-friendly interfaces for a SaaS product using React.js and Material UI, resulting in improved user engagement and satisfaction.
- Collaborated with cross-functional teams, including designers and product managers, to gather requirements and develop solutions that met business needs and user expectations.
- Utilized best practices for web development to optimize web app performance and reduce server bandwidth usage during concurrent logins, resulting in faster load times and improved scalability.
- Conducted thorough testing and debugging to ensure optimal performance and user experience, identifying and resolving technical issues and challenges in a timely and effective manner

SRMPedia

Web Developer

January 2022 - July 2022 (7 months)

Chennai, Tamil Nadu, India

- Learned the basics of web scraping during my time with SRMPedia.
- Took on the challenge of getting the mobile app's web scraper back online, which had been down for some time.
- Collaborated with the development team to identify and fix the issues causing the scraper to fail.
- Successfully revived the scraper, allowing over 3000 SRM students in KTR to access valuable information through the app once again.

CodeChef SRM Student Chapter

Web Developer

December 2021 - July 2022 (8 months)

Chennai, Tamil Nadu, India

Education

SRM University

Bachelor of Technology - BTech, Electrical, Electronics and Communications
Engineering · (September 2020 - May 2025)

St. John's International Residential School
· (July 2013 - April 2020)
